

Yash Sharma

Backend / Full Stack Engineer
Pune, Maharashtra, India
yash25578@gmail.com | +91 84396 88031 | GitHub | LinkedIn

SUMMARY

Backend-leaning Full Stack Engineer with **2+ years of experience** building scalable, production-grade systems using **TypeScript, Node.js, PostgreSQL, and AWS**. Proven ability to own backend architecture, optimize performance, and ship reliable software in fast-paced startup environments.

EXPERIENCE

Bit Hook

Software Developer (Full-Time)

Jun 2025 – Present

Pune, India

- Engineered backend-heavy product features using **TypeScript, Node.js, PostgreSQL, and AWS** for live production systems.
- Architected relational database schemas and optimized queries supporting core business workflows.
- Enforced secure authentication and authorization using **JWT** and **RBAC**.
- Built and operated **10+ REST APIs** and background jobs, improving system throughput and reliability.

Syncliner

Software Engineer Intern

Jun 2025 – Jan 2026

Remote

- Sustained and enhanced full-stack features with a strong emphasis on backend correctness and clean architecture.
- Authored unit and integration tests using **Vitest** and **Playwright**, achieving **80%+ coverage**.

Illusora

Founding Engineer

Nov 2025 – Dec 2025

Remote

- Delivered the complete production website **illusora.com**, including public pages and internal admin dashboards.
- Owned frontend architecture, backend integrations, and deployment pipelines end to end.
- Provisioned and managed **AWS EC2 and RDS** infrastructure ensuring a stable production launch.

Kanbro Corporation

Software Developer Engineer Intern

Dec 2024 – Jun 2025

Remote

- Developed and deployed **2 ERP systems** managing **10,000+ student records**.
- Automated administrative workflows, reducing manual effort by **35%**.

Talenrn

Full Stack Developer

Sep 2023 – Mar 2024

Remote

- Improved backend services and frontend modules for an LMS platform with authentication and real-time features.

PROJECTS

- **Illusora** — Production web platform for a startup. Designed and built a full-stack production application from scratch, including public-facing pages, authentication flows, and internal admin dashboards. Implemented scalable APIs, relational data models, and cloud deployments.
React.js, Node.js, Express.js, PostgreSQL, AWS
- **Greencart** — Logistics and order management platform with driver assignment and delivery tracking.
TypeScript, React.js, Node.js, MongoDB
- **AI Buddy** — AI-powered fitness assistant with posture detection and repetition tracking.
Python, OpenCV, MediaPipe, PostgreSQL, Docker

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++

Backend: Node.js, Express.js, NestJS, FastAPI, REST APIs, GraphQL, WebSockets, JWT, RBAC

Databases: PostgreSQL, MongoDB, MySQL

Cloud & DevOps: AWS (EC2, S3, IAM), Docker, CI/CD, Linux

Frontend: React.js, Next.js, Tailwind CSS

Testing & Tools: Unit Testing, Integration Testing, Vitest, Playwright, Git, Postman

EDUCATION

KIET Group of Institutions, AKTU

B.Tech in Information Technology

2022 – 2026

CGPA: 8.0 / 10
